

# Introducing the new Protrak RF Scout!

The **Protrak RF Scout** gives you all the functionality of the original Scout *plus* a powerful radio transmitter for remote downloading from up to 1000 feet away! The unit can be

downloaded via the radio transmitter or the serial connection. The **Protrak RF Scout** uses a small field-replaceable battery pack to power the unit for up to 30 days.

## With the Protrak RF Scout you get:

- Low priced unit - no monthly fees
- Completely self contained
- 16 channel parallel GPS receiver
- Stores over 12,000 Positions In Memory
- Small size: 3" x 5" x 1.5"
- Magnetic mounting for easy installation
- Built-in motion detector to conserve batteries
- Covert unit operates on 4 C batteries
- Fleet version operates off the vehicle's 12-volt power
- Downloads to mapping software  
(U.S. maps included; specific maps of Canada, Europe, and Latin America available upon request)
- Display vehicle location, speed, heading, lat/lon and time at remote location
- Non-volatile memory saves information even if batteries run out
- Weatherproof package designed to look like car electronics
- Adjustable data recording rate - 10, 20, 30 or 60 seconds
- Data recording rate can be changed remotely via the RF interface
